

Get Ready, Engaged & Informed about Portland Harbor
United States Environmental Protection Agency Holds Community Information Sessions

Get Ready: The Lower Willamette River is a valuable natural resource. However, Portland Harbor, a section of the River between the Broadway Bridge and Sauvie Island, has contaminants which are harmful to people, fish and wildlife. EPA is taking action to make it a cleaner, healthier place to live, work and play. A Proposed Plan that will be released this spring will outline EPA's recommended path for achieving those goals!

Get Engaged: It's not yet time for the plan or public comment. But it is time to engage with EPA to learn more, ask questions and hear information about Portland Harbor before the plan is released.

Get Informed: Come to one of the upcoming Community Information sessions offered by EPA to learn more about Portland Harbor Superfund Site and the options we are considering for cleaning up the river. The Sessions will include:

- Portland Harbor background, contamination, health risks and why EPA is taking action
- Information about cleanup options
- Next steps for public participation/comment during the Proposed Plan release
